

I-Fit Connection Fittings

VP4 & VP3

I-Fit Connection Fittings

Viridian America's I-Fit connection fittings provide a quick way to connect and disconnect our VP-3 and VP-4 pneumatic pumps from the air and liquid tubing. They utilize a two piece construction that eliminates the need to cut the tubing during routine maintenance or when replacing pumps.

Each I-Fit connector consists of a hose barb fitting for connection to the tubing, O-rings for leak-proof sealing, threaded body for connection to the pump, and securing clip to hold the pieces together.

Specifications

- 316 Stainless Steel construction
- 1" fitting for liquid discharge tubing
- ½" fitting for air supply tubing
- 5/8" fitting for air exhaust tubing
- 125 psi pressure rating

Adapter kit required for use with VP3-BL model
